# Summary of Zonal Connect Products 2025

*Italics: Aspirational pending estimates*

Theme	Q1 2025	Q2 2025	Q3 2025	Q4 2025
Increase <b>Head Office</b> operational efficiencies	Delete Products within Zonal Connect that updates Aztec and iOrder (A) *	<i>Allow product configuration to support Nested Conversational Ordering (A) Dep *</i>		
	Configure your products ahead of time with Future Dated Records (A) *	Apply custom bar codes to your sales items and sync them down to Aztec. (A) Dep *		
	Search for products by Aztec Id (Entity Code) (A) *	Configure sales items if they are sold as a container and are sold by weight of a product (A) Dep *	<i><b>Dietary Information</b> – Allow Zonal connect to calculate your dietary information based on ingredients within your sales items</i>	<i><b>Supplier Portal</b> – Put the onus on Suppliers to update purchasable Products – Approve and complete product setup</i>
	Enhanced Validation on Nested Products (A) *	Group Sales items and Instructions into Upsell and Modifier groups and sync upsell groups to iOrder menu manager (A+)	<i><b>Supplier Portal</b> – Put the onus on Suppliers to update cost prices for purchase units.</i>	
	Configure the sync service to Aztec via the Zonal Connect user interface *	<b>Dietary Information</b> - Apply <b>Allergen &amp; Suitability</b> to your Sales items that can used within the Zonal Eco System		

## Dietary Information – Iteration Plan

- Add Nutritional Information to a sales item, approve changes and sync to iOrder.
- Add Allergen & Suitability information to a sales item, approve changes – Data available for Zonal Eco System
- Bulk Approve dietary information changes
- View Dietary information for a subset of Sales items in a list view

### Calculated Dietary Information

- Add dietary information to purchase units, approve changes and Zonal Connect will calculate your dietary information of a sales item.

# Supplier Portal

- Reduce administration configuring products and increase accuracy of product data, by allowing suppliers to manage products in our Supplier Portal
- Allow supplier to update cost prices of purchase items
- Allow suppliers to add and remove products from your purchase product catalogue
- Allow suppliers to update Allergen and Nutritional information & to be used across the Zonal Eco-System
- Accept or decline product and price changes in a fraction of the time.

## EPOS (Aztec)

- Hotel Check-in / Out via EPOS.
- Payment for hotel bookings via EPOS.
- EPOS products posted to PMS, not just sales divisions.
- Enable stock depletion for products sold on PMS to reduce EPOS inventory.
- Change the finance transfer method from FTP to API.

# Single Sign-On

- Users log in once to access multiple Zonal applications.
- Eliminates the need to remember multiple passwords.
- Enables stronger password policies and multi-factor authentication (MFA).
- Reduces time spent on password resets and support tickets.
- Simplifies user provisioning and de-provisioning.
- Promotes consistency in user access and roles management.
